<u>Item 0038AA (and 0138AA if option is exercised)</u>: **Developer Fixed Workstation Upgrade:**
This seat upgrade will apply to CLIN 0001AA (Fixed Workstation Seat) and will accommodate the special requirements of the S&T community by allowing the hardware and software to be reconfigured by the end user without ISF intervention. Customer support will be limited to those services offered by the ISF and not extend to software or hardware loaded and configured by the user. If the Contractor determines that the cause of a reported problem is the result of workstation hardware incompatibility, Government-installed hardware failure, or non-standard software failure, it will be the government's responsibility to resolve the problem.   The mechanism used for visibility to the hardware asset must remain active on the PC. Applicable SLAs will be relaxed in accordance with shared responsibilities for configuration management and support services. These relaxed SLAs are defined in the Attachment references below. The ISF will not be responsible for SLA performance directly impacted by these seats due to the associated relaxed configuration management policies. This seat will employ architectures and policies that are in accordance with the NMCI security requirements. Appropriate measures will be taken to mitigate increased vulnerabilities stemming from the relaxed configuration management policies. This seat upgrade can be used in combination with a CLIN 0007 upgrade. The SLAs associated with 0007 will be modified to incorporate all the changes listed below in the Attachment 2 References.
